Algorithm for Printing the second largest number

Step 1 : Start

Step 2 : Declare variables a,b and c

Step 3 : Read variables a,b and c

Step 4 : if(a>b && a<c || a<b && a>c)

Display a is the second largest number

else if (b>c && b<a || b<c && b>a)

Display b is the second largest number

else

Display c is the second largest number

Step 5 : Stop
